

ViewLaptopDetail , ViewAccessoryDetail

add this line in allproduc.blade.php(livewire)

```
//for laptop
<div class="col-sm-3">

                                <a href="{{ route('viewdeta:
                                <span>View Detail</span>
                                </a>

</div>

//for accessory
<div class="col-sm-3">

                                <a href="{{ route('viewdeta:
                                <span>View Detail</span>
                                </a>

</div>
```

Add these 2 function in AllCategoryController.php (laravel)

```
public function viewdetaillaptop($model){
    $categoryname = Category::all();
    $laptop = Laptop::where('model',$model)->first();
    return view('pages.user.viewlaptop',['laptop' => $laptop
}
public function viewdetailaccessory($model){
    $categoryname = Category::all();
    $accessory = Accessory::where('model',$model)->first();
    return view('pages.user.viewaccessory',['accessory' => $accessory
}
}
```

Add this route :

```
Route::get('/viewdetail/laptop/{model}', [AllCategoryController:  
    Route::get('/viewdetail/accessory/{model}', [AllCategoryContr
```
